### 2017 Education Day – Thank you for your support!

Tuesday marked the advent of the third annual **TEACH** Education Day complete with inspiring keynote presentations by Dr. Larrie Greenberg, the showcase of education research scholarship, and the announcement of newly developed initiatives to honor the hard work and dedication of our exceptional educators. More than 100 individuals from across the health professions attended at least one of the day's events. These events brought together educational scholars, learners, practitioners, and researchers for a day of exploring collaboration and innovation in health professions education.

The day's highlights included three unique keynote presentations education expert Dr. Larrie Greenberg, an oral presentation by trainee Dr. Megan Lord, 19 education research posters from educators across the institution, and the announcement of the first annual **TEACH** Award winners. During Dr. Greenberg's keynote presentations he shared lessons of eliminating incivility within the learning environment, explored the variables of effective teaching, and best practices for teaching effectively.

The annual **TEACH** Education Day celebrates our health professions educators working and learning together across the institution to promote educational excellence. Thank you to all who were able to join us for a day of learning and collaboration. If you were unable to join us for this year's event, please check out the **TEACH** webpage for archived material by [clicking here](#).

### TEACH Award Winners Announced at Education Day—Congratulate Your Colleagues!

Join us in congratulating our four colleagues who were honored as winners of the first annual **TEACH** awards. These four health professions educators were nominated by learners and colleagues across the institution for their dedication and excellence in education. [Click here](#) to view recipients receive awards!

- Innovative Teaching Award recipient: Dr. Claudia Kroker-Bode (Internal Medicine)**
- Scholarship of Teaching and Learning Award recipient: Dr. Helena Carvalho (Basic Science Education)**
- Feedback Award recipient: Dr. PJ Whalen (Pediatrics)**
- Educator Mentorship Award recipient: Dr. David Musick (Internal Medicine/Interprofessionalism)**

### Scholarly Opportunities – Submit now!

The sharing of ideas is paramount to improvement and growth within health professions education. For those engaged in education research, you may feel overwhelmed or anxious at the prospect of tackling a full manuscript describing your work and findings. But, have no fear! This time of year is rife with opportunity to share your innovations, curricular enhancements, and education research accomplishments with health professions educators across the nation via an academic poster or workshop presentation. Capitalize on one (or more!) of the academic calls for poster and/or oral abstracts by clicking the links below!

- [Association of American Medical Colleges \(AAMC\) 2018 Learn Serve Lead Meeting](#)
- [2018 Annual International Association of Medical Science Educators \(IAMSE\) Conference](#)
- [2018 Southern Group on Educational Affairs \(SGEA\) Annual Meeting](#)
- [2018 Society for Academic Continuing Medical Education \(SACME\) Annual Meeting](#)

### Learning with Laughter – The lighter side of education research!

As you gear up to submit a workshop or poster abstract to any of the conference opportunities we included above, study design and statistical analysis are two components you will have to be sure to include. To help lift your spirits as you uneasily begin these rigorous tasks, take a look at the comics below to remind yourself that even education research can be funny!
